Lab 6 - Formatting & Printing Project Plan

Objectives

- The main purpose of conducting this LAB is to give an idea about the formatting and printing of a project Plan in MS Project
- Making use of Gantt Chart wizard to reformat project information

Current Lab Learning Outcomes (LLO)

By completion of the lab the students should be able to

- To display the project summary tasks
- To create a new view based on an existing view
- To format Gantt Bars with the Gantt Chart Wizard
- To draw a text box on a Gantt Chart
- To format a category of text in a view
- To format selected text in a view
- To edit a report's header or footer

Lab Requirements

- One standalone PC for each student
- MS Project 2013 or higher

Lab Assessment

- Six (6) activities should be completed

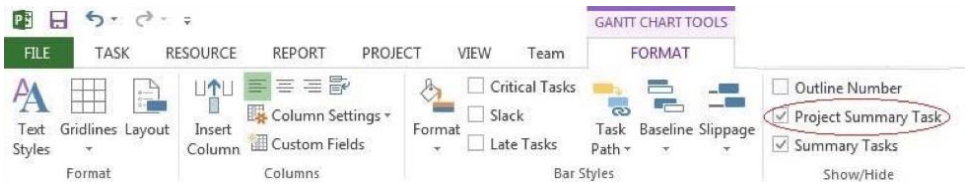
Lab Description

Formatting plays an important role when a Project Manager forwards the desired information to higher management in the form of reports.

Activities

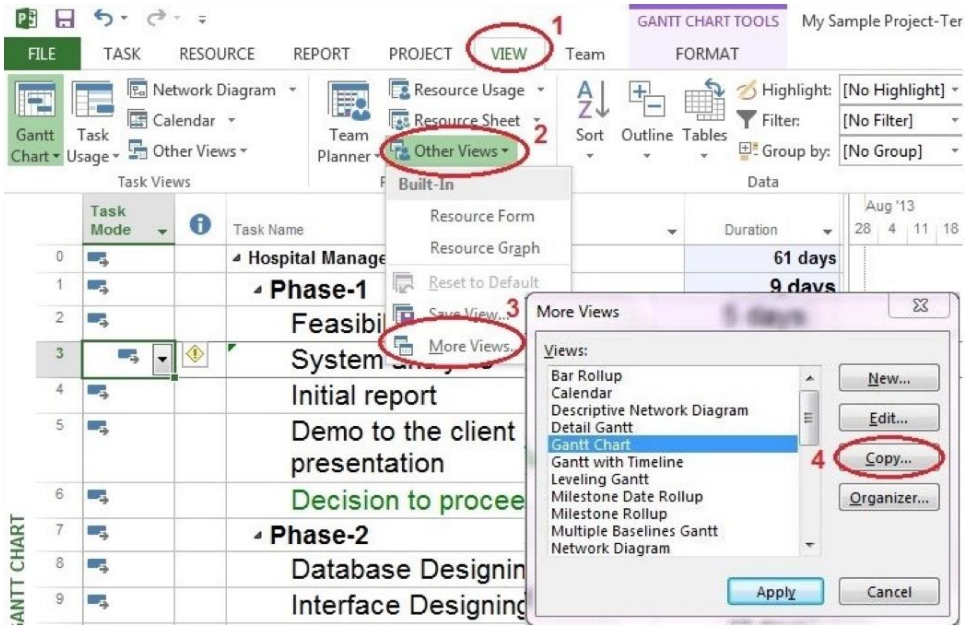
Activity 1: How to display the project summary task/title?

On the **Format** menu, choose the option "Project Summary Task"



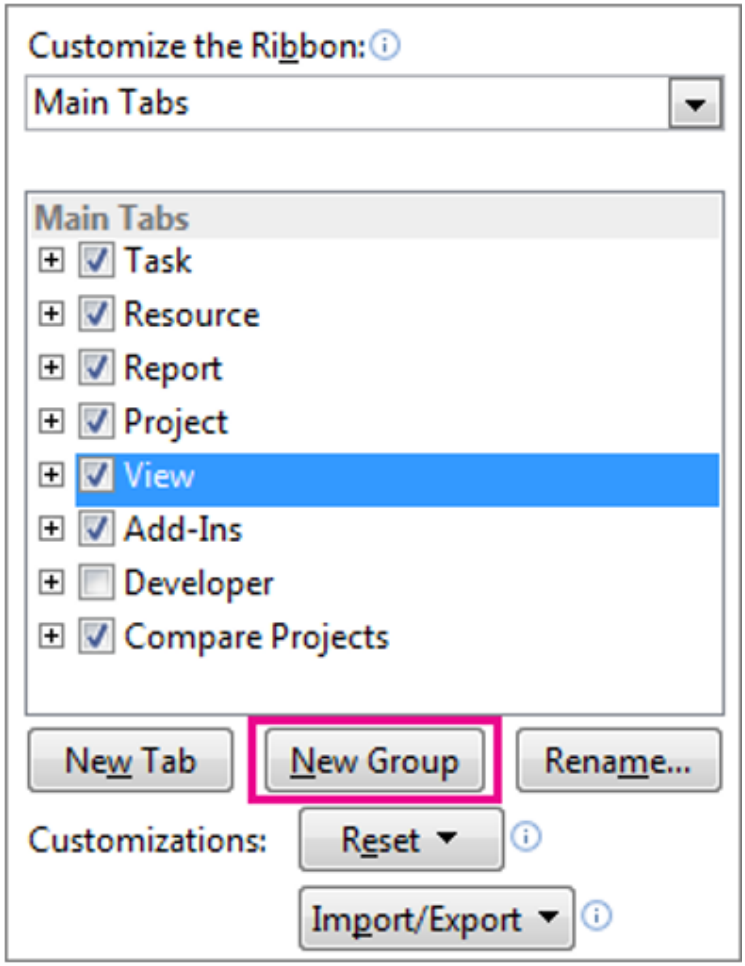
Activity 2: How to create a new view based on an existing view?

1. On the **View** menu, click **Other Views** and then **More Views**
2. In the more views dialog box, click the view's name and then Click **Copy**
3. In the view **Definition** dialog box, enter the name for new view
4. Click **OK**

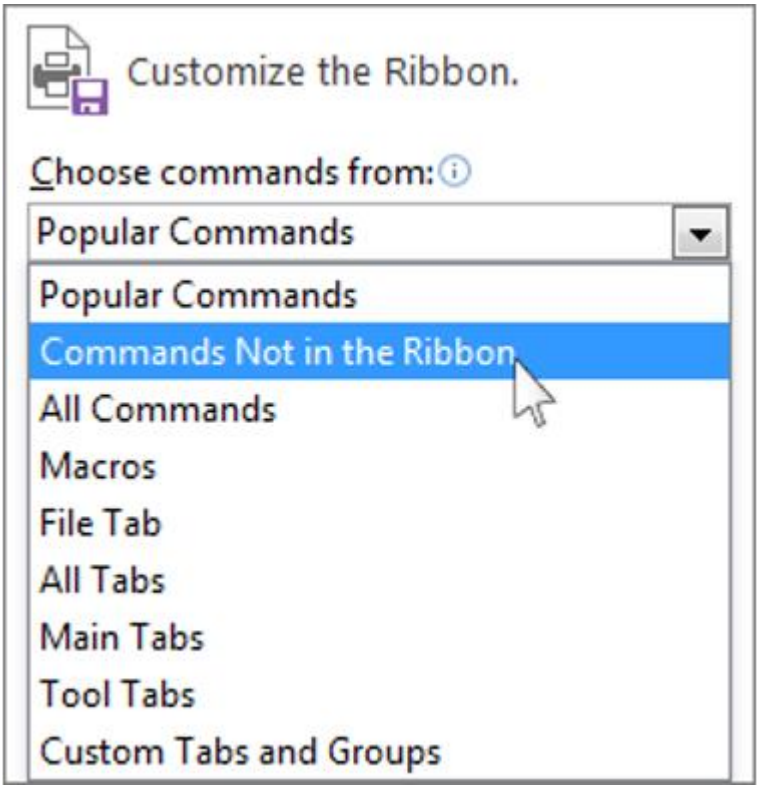


Activity 3: How to format GanttBars with the Gantt Chart Wizard?

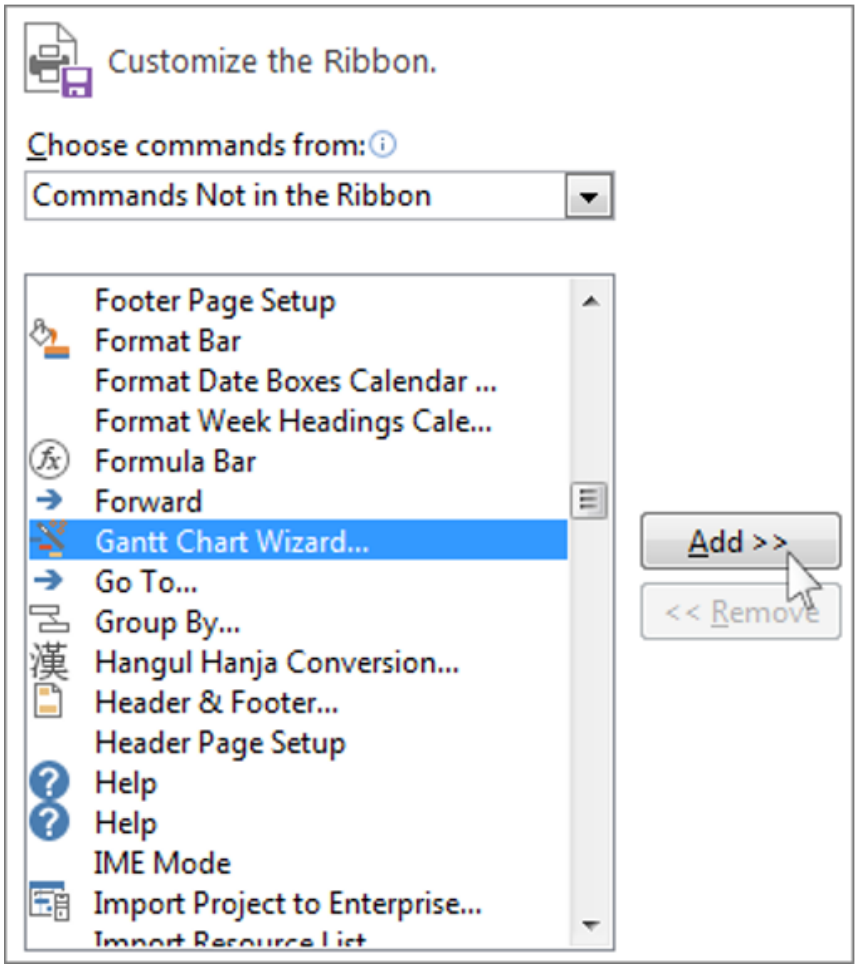
1. Click File > Options > **Customize Ribbon.**
2. In the right column, click the tab you want to add the Gantt Chart Wizard to (for example, View), and then click New Group.



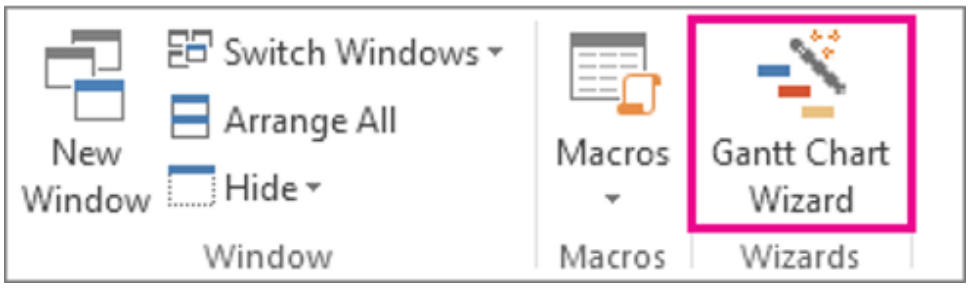
3. To give your new group a name (for example, Wizards), click New Group (Custom), click Rename, type your new name, and then click OK.
4. In the left column, click the arrow under Choose commands from, and then click Commands **Not in the Ribbon**.



5. Page down in the left column, and then click **Gantt Chart Wizard**
6. Highlight the new group you created in step 2 (it's in the right column), click **Add**, and then click **OK.**



7. Click the tab where you put the wizard (in this example, we used the View tab), and then click Gantt Chart Wizard. Follow the steps to create your new chart.



Activity 4: How to draw a text box on Gantt Chart?

1. On the **Format** menu, point to **Drawing options**
2. On the **Drawing** toolbar, select the **Text Box** button and then drag a small box anywhere on chart portion of Gantt Chart view
3. In the box you just drew, type the desired text

Activity 5: How to change text style?

1. On the **Format** menu, click **Text Styles**
2. In the **Item to Change** list, click the type of text you want to change
3. Select the font and other formatting options

Activity 6: How to font's format on Gantt Chart?

1. Click the cell that contains text you want to format
2. On the **Format** menu, click **Font**
3. Click the font and other formatting options

Lab Assignment

Students are instructed to perform all the activities mentioned above to understand how to use formatting options in a Project Plan to make reports more effective.
